Irish Register of Chinese Medical Herbalism

Understanding ADHD and Autism

Treating with Acupuncture &
Simple Western Herbs

A One-Day Workshop with

Dr Julian Scott

PhD, M.A.

The workshop will start with a discussion of Lingering Pathogenic Factors (LPFs), a pattern often acquired during the early years, and how they can lead to imbalances and illness for the rest of life. Typical illnesses are chronic cough, chronic fatigue, depression, as well as neurological disorders like ADHD and autism.

In the past, LPFs were caused by simple illnesses, while now a major cause is the 30 or so immunisations given before one year old.

There will be a discussion on how to support those children and parents who wish to be vaccinated, as well as those who do not, and what parents and carers can do to help.

Bio

Dr Scott is a world renowned author, teacher and clinician specializing in the treatment of children. Having qualified as an Acupuncturist in 1976, he went on to do post graduate study in China in 1982/3, completing an internship in the Jiangsu Hospital for Traditional Medicine.

Since then he has developed his practice and is a world renowned specialist in the treatment of children's problems. He teaches across the world.

Books by Dr Scott:

'Herbs in the Treatment of Children: Leading A Child To Health'

'Acupuncture in the Treatment of Children'

'Acupuncture in the Treatment of Eyes'

(Full CPD Points)
